

Date:05-10-25

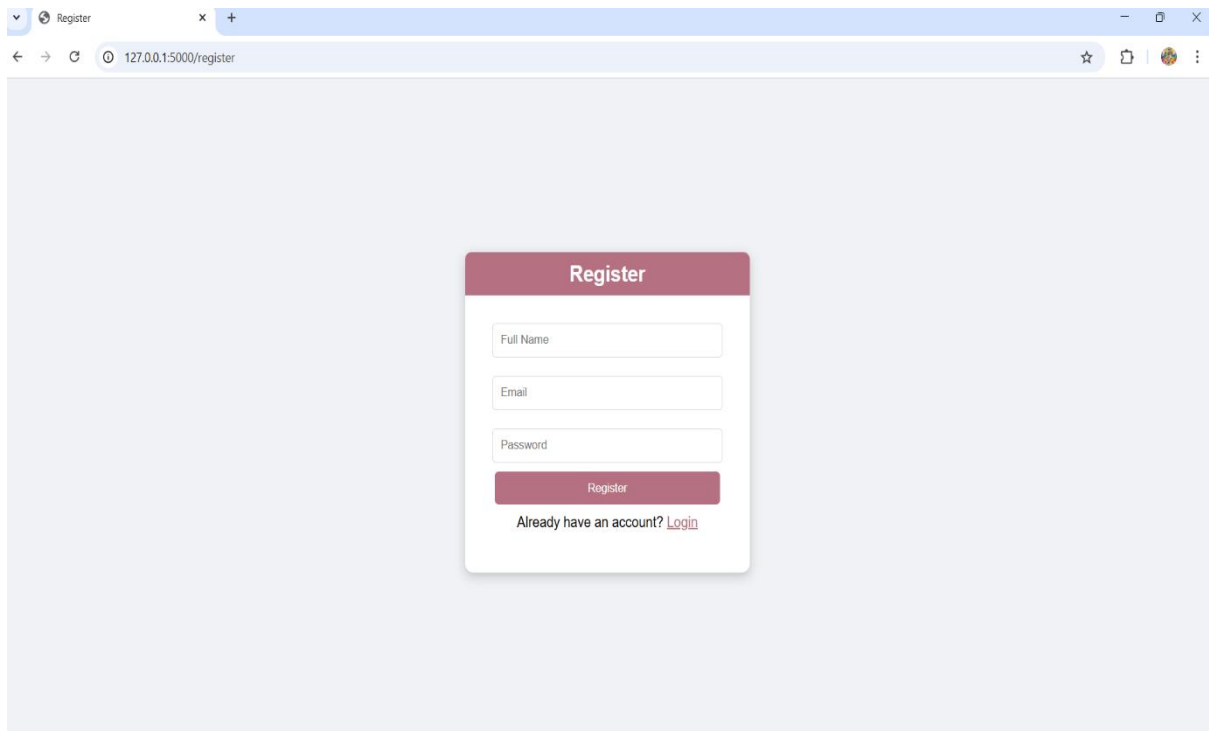

Implementation Details:

LOGIN PAGE:

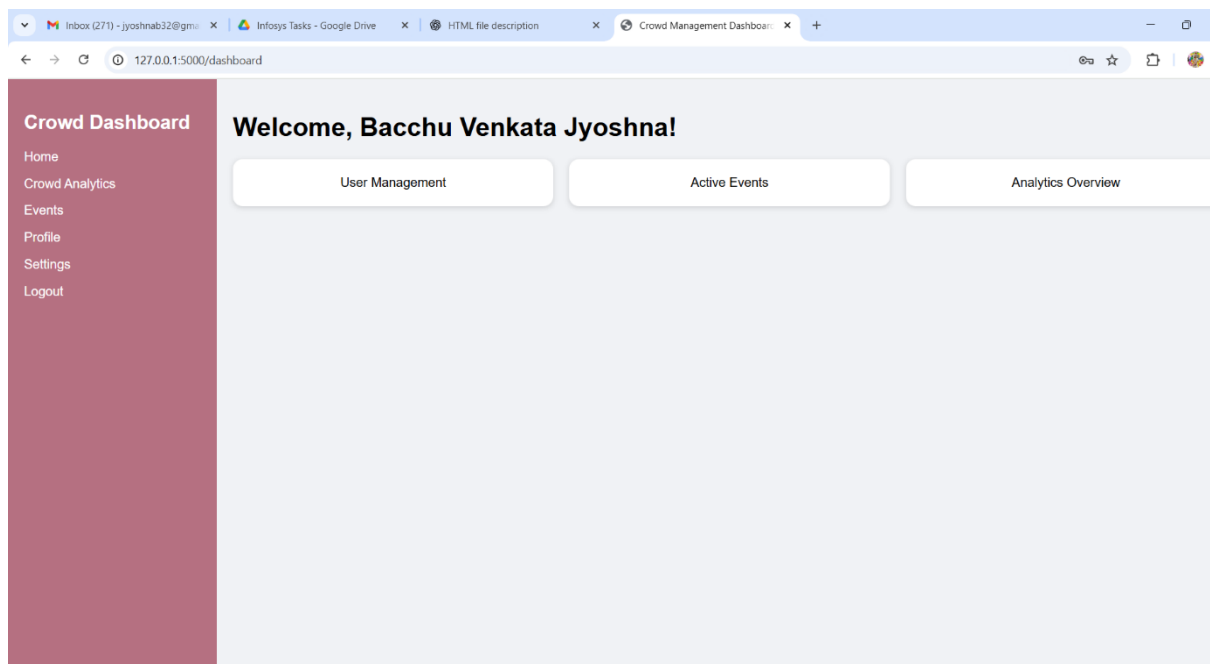

The screenshot shows a web browser window with the title 'Login'. The address bar displays '127.0.0.1:5000/login'. The main content area features a centered login form. The form has a maroon header with the word 'Login' in white. Below the header, there are two input fields: 'Email' and 'Password'. A maroon button labeled 'Login' is positioned below the password field. At the bottom of the form, there is a link that says 'Don't have an account? [Register](#)'.

REGISTER PAGE:

The screenshot shows a web browser window with the title 'Register'. The address bar displays '127.0.0.1:5000/register'. The main content area features a centered register form. The form has a maroon header with the word 'Register' in white. Below the header, there are three input fields: 'Full Name', 'Email', and 'Password'. A maroon button labeled 'Register' is positioned below the password field. At the bottom of the form, there is a link that says 'Already have an account? [Login](#)'.

DASHBOARD PAGE:

◆ login.html

- Contains a form for entering email and password.
- Redirects to dashboard after successful login.
- Provides a link to the register page.

◆ register.html

- Collects name, email, and password.
- Saves user in memory
- Redirects back to login page after registration.

◆ dashboard.html

- Displays sidebar menu and user-specific greeting (using `{{ username }}` from Flask session).
- Contains cards for User Management, Active Events, and Analytics.
